

## **Measures for Justice Launches Groundbreaking Data Portal that Brings New Transparency to Local Criminal Justice Systems in Florida**

**ROCHESTER, NY – May 23, 2017** – Measures for Justice (MFJ) released a Data Portal that tracks how criminal cases are being handled at the county level from arrest to post-conviction. The Data Portal includes all counties in Florida, except for Seminole, which will be added later.

The Data Portal increases the transparency of Florida’s local justice systems by collecting and analyzing criminal justice data and presenting them at the county level.

“I love being able to get somebody else’s objective view of the six counties I oversee. The data allow me to identify practices in our part of the state that may be out of step with the rest of Florida,” said Bill Cervone, Florida State Attorney, Eighth Judicial Circuit and former President of the Florida Prosecuting Attorney’s Association.

The Portal allows users to review and compare performance data within and across states, and to break them down by race/ethnicity; sex; indigent status; age; offense type; offense severity; and attorney type.

“The data are a treasure trove for communities that will now have access to reliable, informative, and comprehensive data about their criminal justice systems,” said Amy Bach, President and Executive Director, Measures for Justice. “Our Portal is intended to be a reference point for conversations about how to address the multiple issues facing the criminal justice system.”

Depending on the county where the case was processed, findings in Florida include:

- defendants accused of misdemeanors pleaded guilty without an attorney between 6% and 78% of the time;
- law enforcement issued citations to appear in court instead of arresting people who committed nonviolent misdemeanors between 1% and 67% of the time;
- felony cases were resolved at trial between 0.2% and 11% of the time.

The Data Portal comprises data that has been passed through a set of performance measures developed by some of the country’s most renowned criminologists and scholars. The measures address three primary objectives of criminal justice systems: Public Safety; Fair Process; Fiscal Responsibility.

The Portal also includes data from Pennsylvania, North Carolina, Washington, Utah, and Wisconsin. Additionally, the Chan Zuckerberg Initiative is joining other funders to help support Measures for Justice’s goal of measuring 20 states by 2020.

MFJ has worked to develop the tool since its founding in 2011. The Laura and John Arnold Foundation, Google.org, Pershing Square Foundation, the MacArthur Foundation’s Safety and Justice Challenge, the Open Society Foundations, and the Draper Richards Kaplan Foundation provide funding and support, in addition to the Chan Zuckerberg Initiative.
